

Lesson 5 – Adding Images and Links

HTML for – Web Development
Lessons

Adding Images to a Web Page

- Use the `` tag to show pictures.
- Attributes:
 - `src`: image file location
 - `alt`: text shown if image can't load
- Example: ``
- Tip: The `` tag doesn't need a closing tag!

Adding Links to a Web Page

- Use the `<a>` tag to make clickable links.
- Attributes:
 - href: where the link takes you
 - target='_blank': opens link in new tab
- Example:
 - `Go to Google`
 - `Visit National Geographic`

Putting Images Inside Links

- You can make a picture clickable by wrapping it in an `<a>` tag.
- Example:
- ``
- ``
- ``

Hands-On Activity – My Favorite Animals Gallery

- Task:
- 1. Create a web page with 3–5 images of your favorite animals.
- 2. Each image should have an alt description and link to more info.
- 3. Add a title using `<h1>`.
- Example structure shown in lesson.

Homework

- Create a 'My Dream Vacation' page with:
 - - 3 images of places you want to visit.
 - - Each image linked to more info about that place.
 - - Use target='_blank' so links open in a new tab.
