

Lesson 6 – Forms and Inputs

HTML for Kids – Web Development
Lessons

What is a Form?

- • A form lets users type information into a webpage.
- • Examples: login forms, search boxes, contact forms.
- • We use the `<form>` tag to start a form.

Basic Form Structure

- `<form>`
- `<!-- inputs go here -->`
- `</form>`
-  Everything inside `<form>` will be part of the form.

Input Fields

- • <input> is used to collect data.
- • Types of input:
 - - type='text' → short text
 - - type='email' → email address
 - - type='password' → hides the letters
 - - type='number' → numbers only
- Example:
- <input type='text' placeholder='Enter your name'>
- <input type='email' placeholder='Enter your email'>

Labels and Buttons

- • <label> = tells the user what the input is for.
- • <button> = clickable button to send the form.
- Example:
- <form>
- <label>Name:</label>
- <input type='text'>

- <label>Email:</label>
- <input type='email'>

- <button type='submit'>Submit</button>
- </form>

Hands-On Activity – Contact Me Form

- Task:
- 1. Make a simple form with:
 - - A text field for name
 - - An email field for email
 - - A password field for secret code
 - - A button that says Send
- 2. Add labels for each field.

Homework

- Create a 'Sign-Up Form' page with:
 - - A username field.
 - - A password field.
 - - A number field for age.
 - - A submit button.
