

Lesson 2: Structuring Web Pages

HTML for Kids – Web Development
Class

By Nuel Chris

What We'll Learn Today

- - Use heading tags (<h1> to <h6>)
- - Use paragraph and line break tags
- - Emphasize text with and
- - Create a mini bio web page

Headings: <h1> to <h6>

- - Headings help organize your page
- - <h1> is the biggest, <h6> is the smallest
- - Used for titles, sections, etc.

Example: Headings

- `<h1>This is H1</h1>`
- `<h2>This is H2</h2>`
- `<h3>This is H3</h3>`
- `<h4>This is H4</h4>`
- `<h5>This is H5</h5>`
- `<h6>This is H6</h6>`

Paragraphs and Line Breaks

- - `<p>`: Used for writing paragraphs
- - `
`: Adds a line break (no closing tag)
- - Helps separate and organize text

Example: Paragraphs and

- <p>This is a paragraph.</p>
- <p>This one is separate.</p>
- <p>This line
has a break in it.</p>

Emphasizing Text

- - ``: Bold text (important)
- - ``: Italic text (emphasized)
- - Makes your text stand out

Example: Emphasis

- `<p>I am very excited to learn HTML!</p>`
- `<p>My hobby is playing piano.</p>`

Hands-On: Mini Bio Page

- `<h1>Hi, I'm [Name]!</h1>`
- `<p>I am [Age] years old and I love [Hobby].</p>`
- `<p>Fun Fact: I once [Fun Detail]</p>`

Wrap-Up & Assignment

- - Headings help organize
- - Paragraphs hold main text
- - `
` makes line breaks
- - `` and `` style your words
-  Homework: Create a mini bio page!
